▪ **How to use this book** legend

NOTE · context KEY · must retain WATCH OUT · gotcha VERIFIED · check

NOTE Read cover to cover once, then use the Contents to jump. Every chapter ends with a EXAM box — if you can answer it cold, move on.

Git

```
git checkout -b feat/x      # short branch, merge daily
git push -u origin feat/x
gh pr create --fill         # PR with CI gate
```

See also: [Git, Branching & Pull Requests](#).

npm / Builds

```
npm ci                # lockfile-exact install (CI only)
npm test
./gradlew build       # wrapper pins toolchain
```

See also: Build Systems.

Docker / GHCR

```
docker build -t ghcr.io/OWNER/APP:sha-SHORT .  
docker push ghcr.io/OWNER/APP:sha-SHORT  
docker pull ghcr.io/OWNER/APP:sha-SHORT    # same digest everywhere
```

See also: [Artifact Management](#).

Threads: [Artifact Digest](#)

Jenkins (Compose lab)

```
docker compose up -d
docker exec jenkins cat /var/jenkins_home/secrets/initialAdminPassword
docker compose stop jenkins          # before backup
docker compose down -v               # destroy everything
```

See also: Lab 06, Lab 08.

Jenkins backup

```
docker run --rm -v LAB_jenkins_home:/data -v "$PWD":/out alpine \  
tar czf /out/jenkins-backup.tar.gz -C /data .
```

See also: Jenkins Advanced.

GitHub Actions snippets

```
runs-on: ubuntu-latest
needs: build          # DAG edge
permissions: { packages: write }
environment: production # approval gate
```

See also: GitHub Actions.

Threads: [Approval Gates](#)

Interview Notes

- Reproduce any pipeline in this file from memory: trigger, build, gate, promote, rollback.
- Which snippet pins versions — and what breaks first when nothing is pinned.
- Where the approval gate lives in each platform's snippet, and what happens without it.

Threads: [Approval Gates](#)
